TRIBAL PERLE RADIATOR

Radiator available in 5 Dimensions :

Size - 220 x 50 cm

Electric version : 1100 W or 1500 W on boosted option

Hydronic version: 982 W or 1380 W on boosted option

Size - 220 x 60 cm

Electric version : 1400 W or 1800 W on boosted option

Hydronic version: 1178 W or 1654 W on boosted option

Size - 220 x 70 cm

Electric version : 1700 W or 1900 W on boosted option

Hydronic version: 1374 W or 1840 W on boosted option

Size - 210 x 60 cm

Electric version : 1300 W or 1700 W on boosted option

Hydronic version: 1112 W or 1579 W on boosted option

Size - 185 x 50 cm

Electric version : 900 W or 1300 W on boosted option

Hydronic version: 803 W or 1190 W on boosted option

Other dimensions are available on request (to the nearest cm)

TECHNICLOGICAL INFORMATION

Olycal® Stone: After 7 years of research and development, Atelier CINIÉR have developed the Olycal® Stone: The olycal stone is crushed at the initial stage of production then restructured in the Ciniér workshop following an exclusive patented process allowing heat to be emitted with high efficiency.

The heating element: HYDRONIC model (European standards EN442-2, control by Cetiat laboratory) or ELECTRIC model (CE electricity).

Boosted version: a new option that will allow you to increase the heating power by 40% in either the hot water or electric versions.

Saving energy: while adapting the power of your radiator to your real needs, CINIÉR thermostat can reduce your energy needs up to 20%.

Greater comfort: while diffusing thermal and radiant heat, CINIÉR radiator allows an even distribution of the heat without creating carbonized dust and pollution. Besides, the products keep absolutely noiseless.

INSTALLATION DETAILS

Electrical version connection:

Standard 230 V supply – X3D thermostat included

Hydronic version connection:

20 cm center-to-center distance with a 3 cm height difference between the start and the return

Thermostatic valve, adjustment tee and flexible hoses are supplied as standard with each CINIER radiator
